## Tonopah Electric &amp; Tire Co.

P. O. BOX 998  
Phone 1814 Residence 1574  
LUNDLEE BROS.

Goodrich Tire Agency—Beat in the long run. If they charge you less they take it out of the tire, if they charge you more they take it out of you. When we do your vulcanizing you get the benefit of the repair process developed by the Goodrich Tire Co. We can show you our sections which have been hard service in icy ruts, our sections are the only part of the tire remaining intact. We positively guarantee our tire sections to stick.

An example of Brascolite efficiency. Main waiting room of Union Station, St. Louis, is 145 ft. long, 100 ft. wide, 70 ft. high. Old fixtures—wall brackets and ceiling chandeliers, total, 20,160 watts—all Mazda lamps replaced by Brascolite Mazda lamps, total 9,000 watts—a saving of 11,160 watts. The lighting efficiency has been doubled—a newspaper may be read in any part of the room.

We hang Brascolites on approval

## Progress Bakery

The war and the war tax have no terror to our bakery. We are selling fifteen full weight loaves of bread for one dollar. Having bought our supply of flour from the miller in advance, we are enabled to furnish you the best and biggest loaf of bread without any additional cost to the consumer. Our delicious Fruit Cake will melt in your mouth. Our own Home Made Mince Pies and Cakes of all descriptions are a specialty. Always pleased to see you, or have you Phone Number Four Hundred and Four.

P. FARRIS, Proprietor,  
Progress Bakery, Water Street

## IRRIGATION IN SOUTHEASTERN NEVADA

Certain valleys of southeastern Nevada contain a large supply of ground water, and part of this water can be economically developed for irrigation, according to a report by Everett Carpenter just issued by the United States geological survey. The localities at which ground water can be found are indicated and the best methods of recovering the underground water at each locality are described. The report contains also an interesting account of the geology of the region and shows that at one time this desert country contained a large river and seven large lakes, all of which are now absolutely dry. The ancient streams and lakes are described and shown on maps for the first time in this report. One of the most valuable features of the report is a guide to watering places on routes of travel, supplemented by a map showing roads and watering places and a table giving the distances between watering places.

## Meadow Valley Drainage Basin

No attempt has been made to utilize ground water for irrigation in Duck valley, but local conditions indicate that considerable water is present there and that in the southern part of the valley it could be profitably pumped for the irrigation of hay, grain, fruit and garden produce to supply Pioche and other mining camps. In Ureine valley water in a bed of unconsolidated sediments resting on impervious bedrock is believed to be easily available for irrigation. In Meadow valley an adequate system of ditches should be provided, and additional irrigation supplies should be developed by pumping from the drainage ditches or from wells. Crops can then be raised that will be more valuable than the wild grass that now grows in much of the irrigable part of the valley. In parts of the Meadow valley can-

you there are irrigable tracts underlain by gravel that contains an underflow near enough to the surface to be profitably pumped for irrigation.

## White River Drainage Basin

In the White River valley above the "sink" conditions are favorable for obtaining groundwater supplies, which in part could be recovered for irrigation. In Pahrangat valley the problem is one of drainage rather than of irrigation, and the developments should be similar to those recommended for Meadow valley. The land should be drained and if the springs do not yield enough water to irrigate the entire valley, additional supplies can be obtained at moderate cost by pumping. In Pahre valley the conditions are unfavorable, but in Coyote spring valley the geologic structure indicates the presence of at least small amounts of groundwater.

## Muddy and Virgin Valleys

In Muddy valley ground water lies near enough to the surface to be profitably pumped for irrigation, but it occurs in quicksand that does not give up its supply readily. Gravel screens such as are used in Mesilla valley, N. Mex., are recommended for trial here.

## Great Basin

In Bristol, Delamar, Coal and Garden valleys conditions are not favorable for finding much ground water. In Indian Spring valley water can be obtained for irrigation by pumping near the south end, but probably not from flowing wells.

## Las Vegas Valley

In Las Vegas valley there are 75 flowing wells ranging from 150 to 1150 feet in depth. The flow of those measured ranged from 16 to 615 gallons a minute. Decrease in

## OFFICE OF NEVADA TAX COMMISSION

Carson City, Nev., April 8, 1915.  
In accordance with Sections 4, 5 and 21 of the Nevada Tax Commission Act, approved March 17, 1915, said commission will begin the holding of public hearings at its office in the state capitol building, Carson City, Nevada, on Tuesday, April 20, 1915, at the hour of 10 o'clock a. m. All those desiring personal or representative hearings are invited to communicate with the undersigned for arrangement of dates. If preferred, presentation may be made in documentary form.

NEVADA TAX COMMISSION.  
L. F. ADAMSON,  
Commissioner-Secretary.

## Application No. 3247.

## Notice of Application for Permission to Appropriately the Public Waters of the State of Nevada.

Notice is hereby given that on the 25th day of January, 1915, in accordance with Section 22, Chapter 149, of the Statutes of 1912, one George O'Neill of Inye, County of Nye and State of Nevada, made application to the State Engineer of Nevada for permission to appropriate the public waters of the State of Nevada. Such appropriation is to be made from Leehead creek, at a point approximately in the S. W. 1/4 of N. E. 1/4, Sec. 12, T. 14, N. R. 39 E., M. D. B. & M., which point is 190 feet northeast from Homestead Monument No. 1, by means of a dam, and two cubic feet per second is to be conveyed to the S. E. 1/4, N. W. 1/4, N. 1/4, Sec. 12, S. E.

N. E. 1/4 and N. E. 1/4 of S. E. 1/4 of Sec. 11, T. 14, N. R. 39 E., M. D. B. & M., by means of a ditch, and there used for irrigation and domestic purposes. Water not to be returned to stream.  
Date of first publication April 9, 1915.  
Date of last publication May 7, 1915.  
(Signed) W. M. KEARNEY,  
State Engineer.

## DELINQUENT SALE NOTICE

CASH BOY CONSOLIDATED MINING COMPANY.

Location of Principal Place of Business, Carson City, Nevada. Location of works, Tonopah, Nye County, Nevada.

NOTICE—There are delinquent upon the following described stock on account of Assessment No. 2, levied on the 15th day of February, 1915, the amount set opposite the name of the respective shareholder:
